CONTENT DISCOVERY ENGINE

Android based Content & Apps discovery platform with Live TV

CloudWalker brings to you CDE, an embeddable Android based platform enabling your customer to enjoy Internet content & Apps as well as discover content on demand on their TV, effortlessly

The CDE allows your customer to truly experience the power of a SMART TV by providing a unique UI which takes away the “wall” between Live TV & Digital Content with which the customer can watch Internet content as well as LIVE TV without having switching between ports

Download and play any APP from popular APP stores and enjoy the power of internet on your TV

DOWNLOADS & PLAYS POPULAR ANDROID APPS ON TV FROM THE MARKET

TECHNICAL INTEGRATION WITH YOUR SMART TV

The CDE is a software solution that can be embedded onto your Smart TVs. Once you have decided, you can be in the market within a matter of days with your own Content TVs!

WHO ARE WE?

CLOUDWALKER, a Technology company owning IPR in creating digital ecosystems for large format screens directly through SMART TV or through conversion of existing TV into Smart TV, by **enabling discovery of APPS & Curated Content through its CONTENT DISCOVERY ENGINE** and providing a cocktail of Online content through the same terminal without "screen shift" and making everything seamlessly available on the same level.
